Vertical and Chest Freezers

*Our story begins in 1956 when 6 entrepreneurial man, engineers and businessman, together founded what would soon become one of the world's largest corporations. Today our low and high voltage motors power the largest machines across mining, quarries, oil platforms, cement plants, refineries, sugar mills, power plants, dairy processing plants, pulp & paper and even the US navy aircraft carriers. Teco are known and respected for our product quality and reliability, we are a chosen brand for the most difficult applications and environments. Teco are a diversified company, with expertise across multiple sectors. Our telecommunication devices help people come close together. Our IT solutions make businesses run more efficiently. Our automation systems help industry run with precision and total control. Our wind turbines generate green energy; and our in-wheel electric motors power emission-free electric vehicles around Asia. Our commercial and home appliances provide comfort to homes and businesses all around the world. This is the Teco Group, a successful global company with 25,000 employees dedicated to making a difference.*

*In Australia we have been the market leader in industrial motors, and our home appliances have been a quiet achiever in many Australian homes. Although we humbly do not talk about our achievements, the truth is that we provide cooling, refrigeration and TVs to many mine sites in the harshest places such as the Pilbara and Kalgoorlie. Equally we have supplied many accommodation villages such as for the Gladstone LNG projects. With Teco you can take comfort knowing our heavy industrial background breeds quality and reliability across all that we do. Our local sales and service team is here to ensure you have support throughout the product life cycle. When you buy Teco, you are acquiring a product engineered to perform, providing the comfort you seek.*
